PREMIUM AESTHETIC SOLUTION

# D.D. CUT

Dew Diamond Face Booster Ampule Solution

**THE NEXT EVOLUTION IN SCIENTIFIC CONTOURING**

# THE CURATOR OF BIO-TECH

## Bridging advanced Korean dermatological science with safe clinical operations.

- **Scientific Foundation:** Focusing on precise protein blending ratios to maximize clinical efficacy without irritation.
- **Regulatory Excellence:** Ensuring 100% legal integrity for global professionals through strictly topical formulas.
- **B2B Empowerment:** Designed exclusively to increase clinic profitability and patient retention.

### Manufacturing Partner

**Janytree Inc.**

Manufactured by South Korea's premier Dermo-Cell cosmetics facility, utilizing pharmaceutical-grade GMP (ISO 22716) quality control standards for professional aesthetic solutions.

# PRODUCT OVERVIEW

## Sculpted Contour & Seamless Calm

D.D. CUT is a professional-grade contouring solution that refines facial silhouettes while providing intensive barrier recovery.

### CLINICAL ACTION

Natural lytic enzymes target localized puffiness and sagging, while high-concentration Centella stabilizes the skin canvas for immediate aesthetic refinement and zero downtime.

# CORE TECHNOLOGY

## Proprietary Protein Blending Ratio

The secret to our zero-downtime efficacy lies not just in the ingredients, but in the exact scientific proportions.

1. The Lytic Agent Bromelain 0.5%

2. The Transporter Lecithin 1.0%

3. The Stabilizer Centella Asiatica 3.346%

# ACTIVE 01: BROMELAIN

## The Lytic Powerhouse (0.5%)

A powerful natural protease enzyme extracted from the stems of pineapples, designed to target and melt unnecessary protein structures.

- **Protein Lysis:** Breaks down complex peptide bonds to smooth skin texture.
- **Edema Reduction:** Rapidly relieves localized swelling and puffiness for a sharper V-line.
- **Anti-Inflammatory:** Inhibits pro-inflammatory cytokines to prevent post-treatment stress.

# ACTIVE 02: LECITHIN

## The Transporter (1.0%)

A premium amphiphilic surfactant that attracts both water and fatty substances, ensuring maximum delivery of active ingredients.

- **Emulsification:** Facilitates the movement and breakdown of triglycerides and waste.
- **Cellular Detergent:** Acts on the fat cell walls to safely dismantle unnecessary accumulation.
- **Absorption Booster:** Drastically enhances the deep dermal penetration of the ampoule.

# ACTIVE 03: CENTELLA ASIATICA

## Intensive Calm (3.346%)

D.D. CUT is uniquely formulated with a massive dosage of high-purity Centella Asiatica Extract to ensure the skin remains perfectly calm during the contouring process.

- **Immediate Soothing:** Neutralizes irritation instantly, ensuring zero downtime.
- **Barrier Repair:** Rebuilds the foundational skin structure and improves elasticity.
- **Collagen Synthesis:** Supports the underlying dermal matrix for a taut, youthful complexion.

# SYNERGY COMPLEX

## Multi-Peptide Matrix

Cellular signals designed to trigger profound dermal tissue regeneration and tightening.

- **sh-Polypeptide-11 & 3:** Induces cellular growth and core elasticity.
- **sh-Oligopeptide-1:** Key factor in damaged skin repair.
- **Acetyl Hexapeptide-8:** Smooths fine lines and relaxes surface tension.

## Botanical Calming Blend

A trio of premium herbal extracts supporting the Centella base for absolute skin comfort.

- **Scutellaria Baicalensis:** Potent antioxidant protection.
- **Salvia Miltiorrhiza:** Promotes micro-circulation.
- **Chamomilla Recutita:** Deep soothing for sensitive skin.

# TRIPLE ACTION MECHANISM

01

## LYSIS

**Bromelain**

Targets and melts unnecessary proteins while rapidly reducing localized swelling and puffiness.

02

## TRANSPORT

**Lecithin**

Acts as a powerful emulsifier, breaking down waste structures and enhancing deep dermal delivery.

03

## STABILIZE

**Centella & Peptides**

Immediately rebuilds the barrier, ensuring zero irritation and leaving a serene, taut finish.

# PRECISION MANUFACTURING

Produced under strict ISO 22716 (Cosmetic GMP) standards by Janytree Inc.

**80°C**

### Phase A & B

Water & Sodium Chloride blending and dispersion.

→

**50°C**

### Phase C

Precise melting of Lecithin, Bromelain, Centella, and Peptides.

→

**30°C**

### Phase D

Final cooling and stabilization of the protein structure.

→

### Quality Control

Micro-filtration, filling, and final packing.

# GLOBAL REGULATORY SAFETY

**100%**

**LEGAL COMPLIANCE**

Zero Compliance Risk for Clinics

## For External Professional Use

D.D. CUT is meticulously formulated and legally classified as a topical cosmetic. Clinics can offer profound contouring results using device-based delivery without assuming unauthorized injection liabilities.

- **KFDA / MFDS (Korea):** Official Registration & CFS
- **TFDA (Thailand):** Registered (10-2-6900003393)
- **GS1 Global:** Authorized GTIN tracking

# PROFESSIONAL CLINIC PROTOCOL

1 **Preparation** Cleanse the face thoroughly. Distribute the D.D. CUT ampoule evenly onto the target areas (jawline, cheeks, submental region).

2 **Device Integration (Synergy)** Combine with **LDM (Ultrasound)** or **Electroporation (EP)** devices. The micro-massage enhances lymphatic drainage while maximizing deep dermal absorption of proteins.

3 **Seal & Finish** Finish the treatment with a cooling modeling mask or RED LED therapy to lock in the active ingredients and accelerate the Centella calming effect.

# EXPECTED CLINICAL OUTCOMES

Cutting Effect

## With Zero Downtime,

### Immediate Return to Daily Life

# D.D. CUT

## The Next Evolution

Upgrade your clinic's contouring portfolio with the most scientifically advanced, legally safe, and highly profitable face booster solution on the market.
